COMPONENT CHECKLIST B Top Cap (x1) C Top Cap (x2) M6 x 50mm Countersunk Screw (x2) Nylon Anchor (x2)

REQUIRED TOOLS

- Power Drill
- 4mm (5/32") Drill Bit
- 8mm (5/16") Drill Bit
- Phillips Head Screwdriver

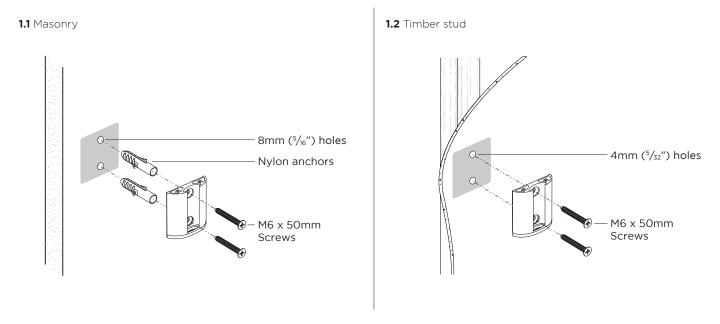

WEIGHT RANGE

0 - 12kg (0 - 26.5lbs) per monitor

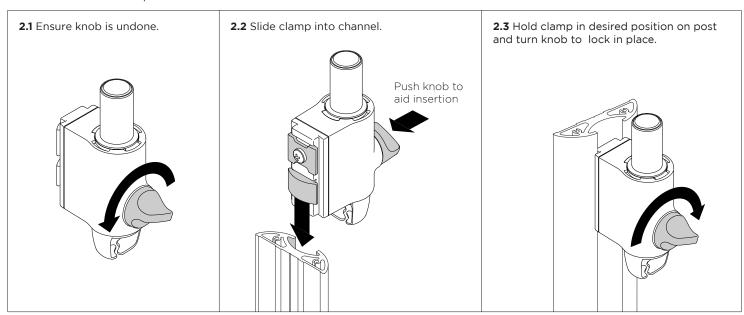

IMPORTANT INFORMATION

- ! Please ensure this product is installed as per these installation instructions.
- This product is compatible with AWM Series products.
- The manufacturer accepts no responsibility for incorrect installation.

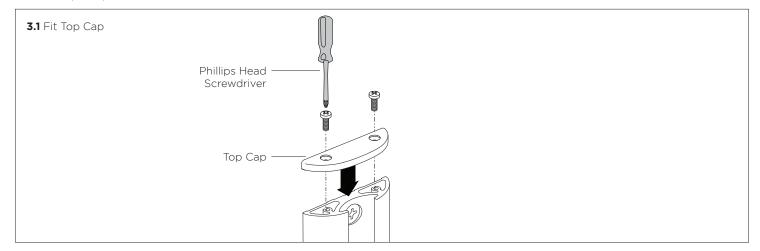

1. Install Wall Channel - Ensure all fasterners are installed

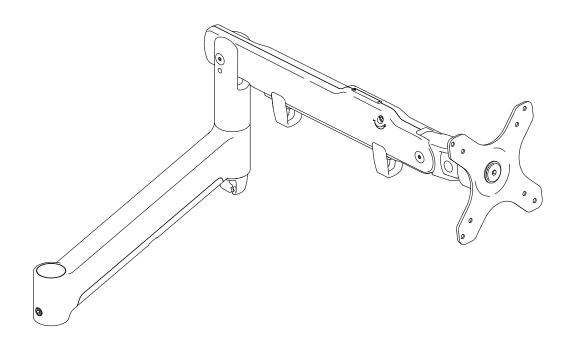

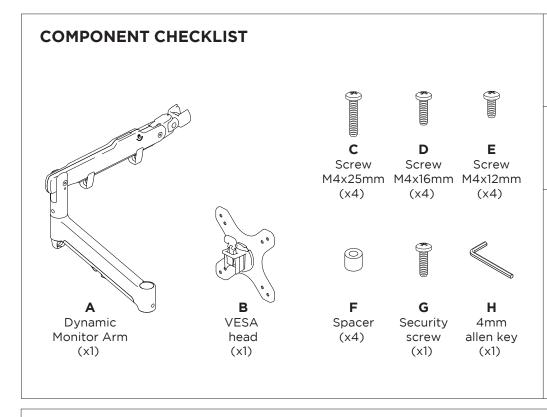

2. Fit channel clamp to wall channel

3. Fit top cap to wall channel

REQUIRED TOOLS

• Phillips Head Screwdriver

WEIGHT RANGE

Flat Monitors

0 - 9kg

(0 - 20lbs)

Curved Monitors

0 - 6kg

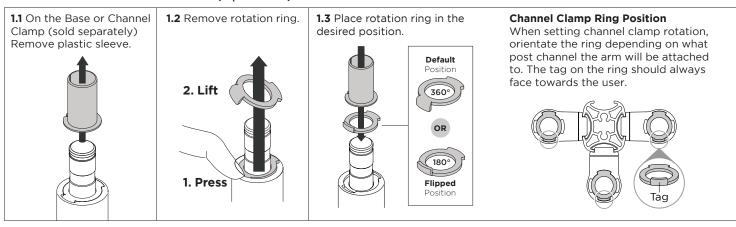

(0 - 13.5lbs)

Monitor weight should be within the weight range of all modular elements that make up the complete monitor mounting solution.

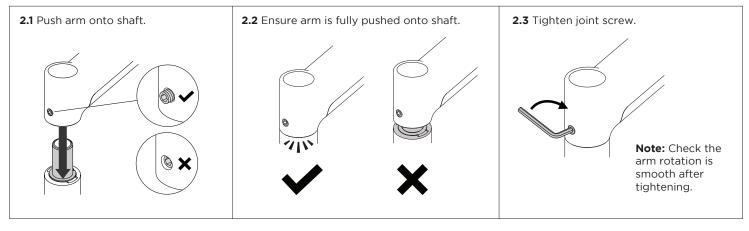

IMPORTANT INFORMATION

- ! Please ensure this product is installed as per these installation instructions.
 - This product is compatible with Atdec AWM Series products.
 - The Dynamic Arm (AWM-AD) requires a Channel Clamp (AWM-LC, sold separately) for installation on an AWM Post.
- ! The Dynamic Arm (AWM-AD) requires a Desk Base (AWM-LB, sold separately) for installation directly onto an AWM fixing.
- ! The manufacturer accepts no responsibility for incorrect installation.
- ! Curved monitors, deep devices (such as all-in-one PCs) and offset VESA locations exert additional leverage that can exceed the capacity of the mount even though the monitor weight may be within the stated range. Please contact Atdec if you would like further information.

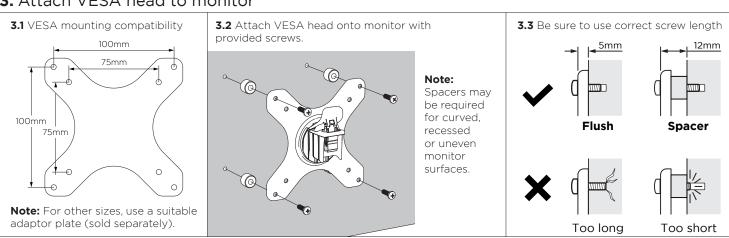

1. Set arm rotation to 180° (optional)

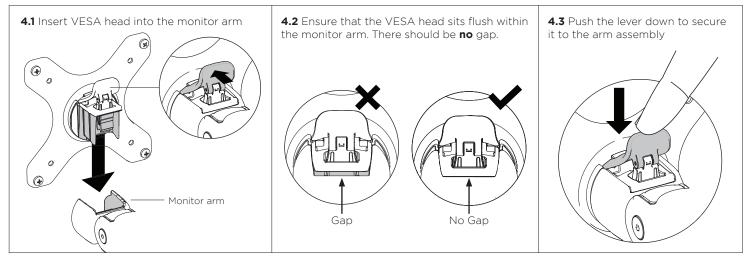

2. Fit arm onto Base or Channel Clamp (sold separately)

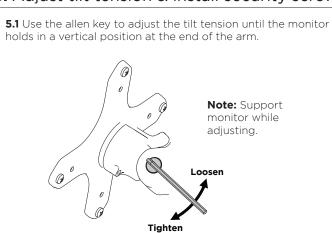

3. Attach VESA head to monitor

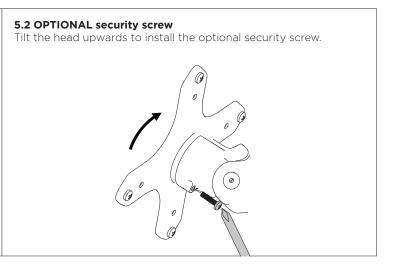

4. Mount monitor on arm

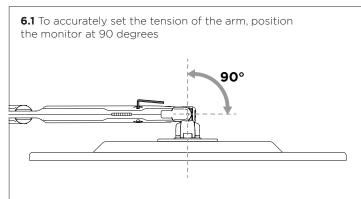

5. Adjust tilt tension & install security screw

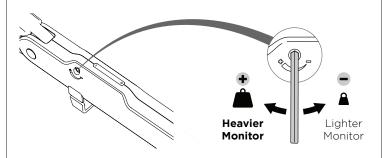

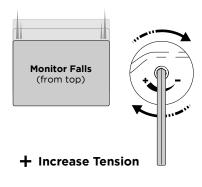

6. Adjust arm tension

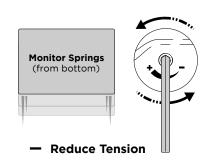

6.2 Use the allen key to adjust the arm tension to the weight of the monitor. Follow steps **6.3** to **6.5** to set the tension.

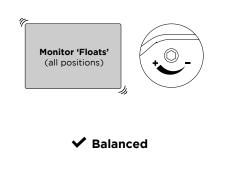

6.3 If the monitor sags or falls down, increase the arm tension by rotating the screw clockwise.

6.4 If the monitor springs upwards from the bottom position, decrease the arm tension by rotating the screw anti-clockwise.

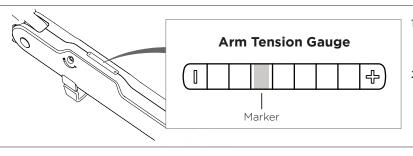

6.5 If the monitor floats or hovers in all positions the arm tension is balanced and does not require further adjustment.

7. Tension gauge

- Set up one monitor and record the position of the marker on the gauge.
- When installing subsequent monitors, pre-tension the arm to the recorded amount, then fine-tune the tension by following steps 6.3 to 6.5.

8. Cable management
