

Component Checklist

IMPORTANT: Ensure you have received all parts against the component checklist prior to installing.

Wall Direct Assembly

NOTE: When attaching the base to the wall, ensure that the mounting holes are vertically aligned.

Bits Bag

Mounting Fasteners

Focus Wall Direct supports a maximum weight of 8kgs (17.5lbs)

TOOLS REQUIRED:

- Power Drill
- 5.5mm (1/4") Drill Bit
- 8mm (5/16") Drill Bit
- Phillips Head Screwdriver

NOTE: This product is designed to support a flat panel monitor in a noninteractive environment. i.e. It should not be used in a situation where the display's position will be frequently changed.

A Disassemble

Step 1

Using the supplied Allen Key, remove the bottom screw.

Step 2

Separate the two components.

B Attach Base to Wall

Masonry Wall

OR

Timber Stud Wall

C Attach Head to Display

OR

D Attach Display to Wall

Step 1

Position the Display & Bracket over the Base.

Step 2

Close the two halves of the Bracket around the Base by firstly positioning the top half and then the bottom half.

Step 3

Reassemble the Wall Direct Assembly ensuring the weight of the display is supported until the screw is tightened.

Tip: This step can be made easier by using two people.

WARNING: Do not overtighten.

E Adjust Display Position

Step 1

Adjust the display to the desired viewing angle then lock it in place by tightening the tilt screw in the direction shown.

WARNING: Do not overtighten.

Step 2

Adjust the display's position between landscape and portrait. The display can rotate through $\pm 95^\circ$.

NOTE: Screen does not rotate 360°
